

Kendal® Outreach, LLC is pleased to introduce . . .

CAPStone – *Dignity in Dementia Training*
Creative Approaches Person-centered Solutions

CAPStone is a formalized educational experience that incorporates team building, interactive learning, and hands-on coaching. It is a systems changing process that enables care to be given in a manner that preserves the individual resident's dignity, and achieves and maintains their highest level of function while addressing and reducing challenging behaviors.

CAPStone is designed to:

- Heighten staff sensitivity to potential unmet needs of residents with dementia
- Develop effective communication skills which can enhance relationships of trust between residents, families and caregivers
- Increase awareness of environmental elements that can enrich quality of life
- Develop strategic plans to implement new approaches in care practices for improved resident outcomes
- Develop team-based practices that will transition to delivery of person-centered care for all residents regardless of their diagnoses
- Customize programs to meet the needs of individual organizations

All **CAPStone** educational sessions offer CEUs for nurses, administrators and activity professionals.

If you would like more information or to discuss this program, please fill out this card and you will be personally contacted by a Kendal Outreach representative.
